

Clear, Concise and Correct specifications assure the correct application of systems, competitive bidding and no embarrassing change order requests. RPC is happy to assist you in developing a section that is worthy of the Three C's plus one more, *Current*. Our experts are in the trenches every day. When a new model or feature comes to the market we visit an installation and find out if it performs as advertised.

As an installation company offering products from several manufacturers we have the advantage of learning first-hand the issues that affect quality, cost and coordination among trades. Our staff are both industry experts and Construction Document Technologists. We are happy to have a small part in improving the industry by sharing our knowledge, and helping you produce the best possible documents.

We can update your master or edit the section for a specific project. We highlight all changes for your review. If the deadline is looming, we will do whatever it takes to keep your schedule.
